METHODOLOGY AND SOURCES

The methodology used to create these estimates and forecasts are based on U.S. Census as well as other sources (The Economist, The Heritage Foundation, private research studies, trade association studies, etc.).

The series is unique because it is 1) timely (the most recent Census data is from 2010) and 2) highly accurate (our proprietary economic model uses regression analysis for its forecasts as well as a number of data resources to produce consensus industry estimates).
