

The **2023 Global High Tech & Emerging Markets** report series is the leading series on high technology products and services sold in over 200 countries. This series estimates sales for over 1,000 high tech products and services from 2016 to 2021 and forecasts sales for 2022 to 2029.

With over 300 pages each 2023 edition of the **Global Services & Markets** series features:

- 2016-2029 sales by country in US dollars and local currency
- 2023 costs such as operating expenses, annual payroll, cost of insurance, fringe benefits, contract work, lease and rental payments, etc.
- 2023 costs of services for transportation, warehousing, printing, advertising, legal services and accounting and auditing services, etc.
- a summary matrix of sales by countries and regions

Major product lines included in the report series are:

- Artificial Intelligence
- Blockchain Services
- 3D Printing
- Medical Devices and Implants
- Virtual Reality Services
- Internet of Things
- Robotics and Automation
- Cloud Services
- Electric Vehicles
- Smart Home Devices

METHODOLOGY AND SOURCES

The methodology used to create these estimates and forecasts are based on U.S. Census as well as other sources (The Economist, The Heritage Foundation, private research studies, trade association studies, etc.).

The series is unique because it is 1) timely (the most recent Census data is from 2020) and 2) highly accurate (our proprietary economic model uses regression analysis for its forecasts as well as a number of data resources to produce consensus industry estimates).

BARNES REPORTS

Barnes Reports provide the most current and accurate estimates of the size of the largest manufacturing, retail, wholesale and services industries in the United States and the World.
