

The **2021 Global Manufacturing & Markets** report series is the leading series on equipment and materials manufactured in over 200 countries. This series estimates shipments for over 2,000 equipment and material types from 2014 to 2019 and forecasts shipments for 2020 to 2027.

With over 300 pages each 2021 edition of the **Global Manufacturing & Markets** series features:

- 2014-2027 shipments by country in US dollars and local currency
- 2021 costs and value added categories such as cost of materials, cost of resales, cost of fuels, electricity, contract work, value added by manufacturing, etc.
- 2021 capital expenses for buildings and structures, machinery and equipment, automobiles and trucks, computers and peripherals, etc.
- Executive Summary of 2021 global manufacturing sector and subsectors such as transportation equipment mfg., machinery mfg., food and beverage mfg., etc.
- a summary matrix of shipments by countries and regions

Major equipment and materials included in the report series are:

- Automobiles and Trucks
- Airplanes, Trains and Boats
- Food & Beverage Goods
- Chemical Products
- Wood Products
- Iron/Steel Products
- Hardware Products
- Printing Machinery and Materials
- Medical Equipment
- Computers and Peripherals

#### **METHODOLOGY AND SOURCES**

The methodology used to create these estimates and forecasts are based on U.S. Census as well as other sources (The Economist, The Heritage Foundation, private research studies, trade association studies, etc.).

The series is unique because it is 1) timely (the most recent Census data is from 2010) and 2) highly accurate (our proprietary economic model uses regression analysis for its forecasts as well as a number of data resources to produce consensus industry estimates).

#### **BARNES REPORTS**

Barnes Reports provide the most current and accurate estimates of the size of the largest manufacturing, retail, wholesale and services industries in the United States and the World.
