

The **2023 Global Manufacturing & Markets** report series

is the leading series on equipment and materials manufactured in over 200 countries. This series estimates shipments for over 2,000 equipment and material types from 2016 to 2021 and forecasts shipments for 2022 to 2029.

With over 300 pages each 2023 edition of the **Global Manufacturing & Markets** series features:

- 2016-2029 shipments by country in US dollars and local currency
- 2023 costs and value added categories such as cost of materials, cost of resales, cost of fuels, electricity, contract work, value added by manufacturing, etc.
- 2023 capital expenses for buildings and structures, machinery and equipment, automobiles and trucks, computers and peripherals, etc.
- a summary matrix of shipments by countries and regions

Major equipment and materials included in the report series are:

- Automobiles and Trucks
- Airplanes, Trains and Boats
- Food & Beverage Goods
- Chemical Products
- Wood Products
- Iron/Steel Products
- Hardware Products
- Printing Machinery and Materials
- Medical Equipment
- Computers and Peripherals

METHODOLOGY AND SOURCES

The methodology used to create these estimates and forecasts are based on U.S. Census as well as other sources (The Economist, The Heritage Foundation, private research studies, trade association studies, etc.).

The series is unique because it is 1) timely (the most recent Census data is from 2010) and 2) highly accurate (our proprietary economic model uses regression analysis for its forecasts as well as a number of data resources to produce consensus industry estimates).

BARNES REPORTS

Barnes Reports provide the most current and accurate estimates of the size of the largest manufacturing, retail, wholesale and services industries in the United States and the World.
